

Serial No. 10/044,919
Amdt. dated January 29, 2004
Reply to Office Action of October 29, 2003

Docket No. P-0334

Amendments to the Specification:

Please replace paragraph starting on page 4, line 8 line and ending on page 4, line 13 with the following amended paragraph:

Thus sucked up air is blown into the body part ~~1222~~ 122 through the first supporting shaft 112, to thus cool the electric motor 133 and the decelerator 135, and is discharged into the inside of the head case 111 through a through hole 129 and the discharge hole 126. The air discharged into the inside of the head case 111 is sucked up into the cleaner body together with the sucked up air and the alien substances through the suction hole 116 of the head case 111.

Please replace paragraph starting on page 8, line 2 and ending on page 8, line 4 with the following amended paragraph:

Figure [4] 4A is a horizontal sectional view showing a suction head of a vacuum cleaner with a power brush cooling device according to an embodiment of the present invention;

Please add the following new paragraph on page 8, after line 4:

Figure 4B is an enlarged view of area "A" of Figure 4A;

Please amended the paragraph beginning on page 8, line 10 and ending on page 8, line 10 with the following amended paragraph:

Serial No. 10/044,919
